

I chose question 1. What does peace with creation look like to you?

I chose the following *laudato si'* quote because it makes a connection to how I feel about the planet. This quote connects to what I drew because on my drawing it has half of the world as a healthy, sustainable environment, where as on the other side it has a polluted environment. For the side that is sustainable I drew nice healthy trees with clear blue oceans and on the polluted side I drew factories with smoke coming from them and lots of infrastructure. I included this because I think it is a great way to represent the quote and to display what is being done to the world. Caring for creation connects to our school theme hope because it is telling us that our actions matter because they can have consequences on future lives.

Lavado 55 paragraph  
26  
"The Earth, our home, is beginning  
to look more and more like an immense  
pile of filth."
