Religion Laudato si

Why is it important for young people to reconnect with creation?

Laudato si told us to care for creation, yet we still take everything at our will, thinking it wouldn't make much of a difference. But you're wrong, everything we do can make a huge difference to mother nature. As still a young individual, I believe that by the time I'm 30 there will be no longer a reason to live, since there will no longer be any more life to live for. Heck! I might even not live to 30! That is why I'm doing my part to clean up this world. It may not be enough, but it's what I have to say and feel. Think about your children and the life they will live. If we keep this up, the last view they'll see is darkness and a lifeless abyss. "Inequity affects not only individuals but entire countries; it compels us to consider an ethics of international relations. A true 'ecological debt' exists, particularly between the global north and south." Caring for creation demonstrates St Columbas College's theme of 2025 "Hope" by having hope on saving mother nature, doing our part, as much as we can to clean up this bin.
