

PART TWO

Artwork connection

"We know that technology based on the use of highly polluting fossil fuels – especially coal, but also oil and, to a lesser degree, gas – needs to be progressively replaced without delay."

My artwork relates to this because one side is dead nothing is lively or colourful it has no life one side representing what will eventually happen to our planet if we don't do something about global warming. While the other side is showing growth and life, flowers growing, healthy tree, lively grass. This represents if we react to what we were called for in the image of God. My connection to Hope is the dove flying over all the dead plants and giving them life and regrowth.

Q.What does peace with creation look like to you
